

WELCOME TO QUANTUM ACTIVISM VISHWALAYAM

Educational Wing of CQA

About Us

Establishing our two-year master's and three to five-year Ph.D. programs in the Quantum Science of Health, Prosperity, and Happiness was the critical leap that we have taken with our partners at University of Technology, Jaipur, necessitated partly due to the reluctance of the traditional academe to change its materialist ways. Quantum Activism Vishwalayam is providing students with professional level transformational training in consciousness and the quantum worldview with an emphasis on quantum living and the exploration of wholeness in their professional pursuits.

Masters and PhD

Department of Quantum Science

Health, Prosperity and Happiness

Teaching Objectives

Consciousness

Health, happiness and prosperity – these are the three main pillars of a satisfactory professional life. Education and training for these human professions, namely Medicine, Psychology, and Business, require a science that specifically addresses the issues of consciousness and its experiences. The education that you will receive is based on Quantum Science and the primacy of Consciousness.

Transformation

To teach people, the healer or the therapist or the business leader must walk their talk for which they will need the kind of transformational education that we provide. All our courses have an experiential and transformational component.

Creativity

With Quantum science we have discovered the secret of creativity, transformation, and manifestation of our intentions. This is the third pillar of the education we provide.

Benefits of Transformative Education

- It is a transformative education that brings sustainable changes.
- You will experience a sense of spiritual satisfaction while pursuing your profession.
- You will understand and optimize your brain potential: instead of being a slave to the brain, you will be the boss of the brain.
- You will learn how to heal yourself and prepare for embody positive emotions and improve your relationships.
- You will achieve congruence in your thinking, living and how you earn your livelihood.
- There will be experiential learning modules for a proper internalization of concepts

Practical Information

- The program is mostly online, consisting in pre-recorded video series, textbooks and live webinars, with only 10 days of proximity per year training program in Jaipur, India.
- The program is suitable for any professional. All live webinars are scheduled on weekends.
- We offer affordable fees and a flexible payment structure.
- Our program is multinational, bilingual (Portuguese and English)
- The University we are affiliated with, is accredited by University Grants Commission, India.

Our advanced degrees are issued by the **University of Technology, Jaipur, India**, a fully accredited higher education institution in India.

The programs are available in **English** and **Portuguese**.
