

CERTIFICATION PROGRAMS FOR QUANTUM PROFESSIONALS

1. POSITIVE PSYCHOLOGY QUANTUM STYLE

- **Quantum Worldview (QS1)** - In this course, we review the quantum worldview with special attention to quantum activism. Emphasis shall be placed upon basic quantum physics, the quantum worldview, and the quantum principles that are most used in quantum activism.
- **Quantum Science of Manifestation (QS2)** - In this course, we discuss the most popular question, If I can choose reality according to quantum physics, how do I manifest things I want? We discuss barriers, we discuss how to overcome barriers especially the approach of family constellation therapy, we discuss how to intend properly, we discuss the creative process behind manifestation.
- **Quantum Creativity (QS11)** - After a definition and a four-fold classification of creativity (situational and fundamental, outer and inner), we discuss the quantum theory of the creative process in some detail. The role of inspiration, intention, intuition, imagination, incubation, insight, and implementation (the 7 I's) is clarified. The creative process of do-be-do-be-do is explained. The science of manifestation is also clarified. We explore situational and fundamental creativity with scientific exploration as an example.
- **The Return of the Archetypes (QS37)** - Under the influence of first Euro-imperialism and second materialist science, professions have lost their original motivation, namely archetypal exploration. In this course, after a brief historical review, we will discuss how the archetypes must make a comeback and professions become restored to their civilized intent. The entrepreneurial possibilities of this enterprise are enormous and are fully explored.
- **Quantum Neuroscience (QS10)** - This course is about the brain and the experimental evidence that is mounting in favour of quantum neuroscience. The problem of how the brain gets its Self is solved in the context of two paradoxes: the paradox of perception and the paradox of quantum measurement. We discuss how the brain is quantum, and how the causal body, the subtle body, and the gross bodies are needed to manifest reality.

- **Quantum Science of Happiness (QS23)** - In this course, we take up the subject of happiness beginning with the quantum version of positive psychology. We then define a scale of happiness—the expansion of consciousness serving as its defining factor. We review the basic science of experience, theory of reincarnation and evolution, and the theory of creativity. Then, we discuss, step by step, how to climb the ladder of happiness.
- **Supplement: Introduction to Quantum Yoga (part 1) (QS25)** - Quantum Yoga facilitates a broad gamut of techniques that are extremely effective in restoring health, both physically and psychically. Many people have, unfortunately, accepted living with minor and major defects that limit them from experiencing life at its fullest. In yoga, even a disease may serve as a gateway to achieving physical, emotional, mental, and spiritual health and harmony. We will explain the approach that Quantum yoga takes in the process of healing.

Upon successfully completing the certification course requirement and passing the final exam, you will be qualified to counsel people, as a certified Quantum Mental Health practitioner, on how to attain Positive Mental Health.

2. QUANTUM LIFE COACHING

- **Quantum Worldview (QS1)** - In this course, we review the quantum worldview with special attention to quantum activism. Emphasis shall be placed upon basic quantum physics, the quantum worldview, and the quantum principles that are most used in quantum activism.
- **Quantum Higher Education (QS30)** - The idea of education as removal of ignorance is introduced as a part and parcel of a child's growing up and an adult's finding satisfaction in life. The quantum science of education is developed in the same style as the ancient India's concept of paravidhya, education that takes you beyond the veil of base-level human condition to higher intelligence and happiness.
- **Quantum Creativity (QS11)** - After a definition and a four-fold classification of creativity (situational and fundamental, outer and inner), we discuss the quantum theory of the creative process in some detail. The role of inspiration, intention, intuition, imagination, incubation, insight, and implementation (the 7 I's) is clarified. The creative process of do-be-do-be-do is explained. The science of manifestation is also clarified. We explore situational and fundamental creativity with scientific exploration as an example.

- **Quantum Science of Happiness (QS23)** - In this course, we take up the subject of happiness beginning with the quantum version of positive psychology. We then define a scale of happiness—the expansion of consciousness serving as its defining factor. We review the basic science of experience, theory of reincarnation and evolution, and the theory of creativity. Then, we discuss, step by step, how to climb the ladder of happiness.
- **The Return of the Archetypes (QS37)** - Under the influence of first Euro-imperialism and second materialist science, professions have lost their original motivation, namely archetypal exploration. In this course, after a brief historical review, we will discuss how the archetypes must make a comeback and professions become restored to their civilized intent. The entrepreneurial possibilities of this enterprise are enormous and are fully explored.
- **Quantum Neuroscience (QS10)** - This course is about the brain and the experimental evidence that is mounting in favour of quantum neuroscience. The problem of how the brain gets its Self is solved in the context of two paradoxes: the paradox of perception and the paradox of quantum measurement. We discuss how the brain is quantum, and how the causal body, the subtle body, and the gross bodies are needed to manifest reality.
- **Supplement: Introduction to Quantum Yoga (part 1) (QS25)** - Quantum Yoga facilitates a broad gamut of techniques that are extremely effective in restoring health, both physically and psychically. Many people have, unfortunately, accepted living with minor and major defects that limit them from experiencing life at its fullest. In yoga, even a disease may serve as a gateway to achieving physical, emotional, mental, and spiritual health and harmony. We will explain the approach that Quantum yoga takes in the process of healing.

Upon successfully completing the certification course requirement and passing the final exam, you will be qualified to engage in the rapidly developing new profession of Life Coaching, as a Quantum Life Coach.

3. QUANTUM HEALTH MANAGEMENT: NUTRITION, PREVENTIVE HEALTH AND QUANTUM HEALING

*Special Requirement: Bachelor degree, preferably in Medicine
(conventional and complementary)*

- **Quantum Science of Manifestation (QS2)** - In this course, we discuss the most popular question, If I can choose reality according to quantum physics, how do I manifest things I want? We discuss barriers, we discuss how to overcome barriers especially the approach of family constellation therapy, we discuss how to intend properly, we discuss the creative process behind manifestation.
- **Quantum Science of Consciousness and Experience (QS9)** - We discuss the quantum science of how consciousness and its ideas are embodied in matter. Quantum science of experience and how it generates new concepts for integrative and preventive psychology and medicine, especially the concept of five, not one, bodies to take care of.
- **Quantum Neuroscience (QS10)** - This course is about the brain and the experimental evidence that is mounting in favour of quantum neuroscience. The problem of how the brain gets its Self is solved in the context of two paradoxes: the paradox of perception and the paradox of quantum measurement. We discuss how the brain is quantum, and how the causal body, the subtle body, and the gross bodies are needed to manifest reality.
- **The Quantum Doctor (QS17)** - The purpose of this course is to demonstrate the scientific nature of conventional and alternative medicine (CAM) through the principles of quantum physics and to explore ways to integrate them to build a new integrative medicine for human beings. The goal of the course is to educate participants on the principles of inner harmony, harmony with nature, and spiritual harmony as foundations of healing. The key issue discussed here in great detail is the challenge of integrating these practices into modern lifestyles addressing present health condition.
- **Quantum Integrative Medicine (QS31)** - This course is dedicated to everyone genuinely interested in healthy living, and it refers to the awakening of that healing power that we all have within. We will learn how to regain our inborn potential by unleashing the power of the subconscious mind through techniques that allow one to consciously access the supramental level, Vijnanamaya Kosha. The more we learn how to tap into our essence, the quantum self, the more we are open to realizing our immense potential to attain health and joy in life.

- **Introduction to Quantum Yoga (part 1) (QS25)** - Quantum Yoga facilitates a broad gamut of techniques that are extremely effective in restoring health, both physically and psychically. Many people have, unfortunately, accepted living with minor and major defects that limit them from experiencing life at its fullest. In yoga, even a disease may serve as a gateway to achieving physical, emotional, mental, and spiritual health and harmony. We will explain the approach that Quantum yoga takes in the process of healing.
- **Introduction to Quantum Yoga (part 1) (QS25)** - Quantum Yoga facilitates a broad gamut of techniques that are extremely effective in restoring health, both physically and psychically. Many people have, unfortunately, accepted living with minor and major defects that limit them from experiencing life at its fullest. In yoga, even a disease may serve as a gateway to achieving physical, emotional, mental, and spiritual health and harmony. We will explain the approach that Quantum yoga takes in the process of healing.

Upon successfully completing the certificate course requirement and final exams, you will be qualified to practice as a Quantum Health Manager.

4. QUANTUM SPIRITUALITY

- **Quantum Worldview (QS1)** - In this course, we review the quantum worldview with special attention to quantum activism. Emphasis shall be placed upon basic quantum physics, the quantum worldview, and the quantum principles that are most used in quantum activism.
- **Science and Indian spirituality (QS3)** - We trace the lineage of quantum science, a developing science within the primacy of consciousness, all the way to the birth of Indian spirituality, especially the Vedanta. In this video series of lectures, we trace more details of the progression: from Vedanta to the Bhagavad Gita to the Yoga Sutras of Patanjali to Sri Aurobindo's Integral Yoga. Finally, the integration of science and spirituality thus achieved is shown common also with the teachings of Jesus and Buddha.
- **Physics of the Soul (QS4)** - The subject of this course is reincarnation: its scientific theory, evidence, and lessons. In this course, we will begin with a scientific theory of reincarnation based on the idea of quantum nonlocal memory. We will examine new data. We explain concepts such as karma, guna, and dharma and emphasize their importance in our lives.

- **Quantum Science of Happiness (QS23)** - In this course, we take up the subject of happiness beginning with the quantum version of positive psychology. We then define a scale of happiness—the expansion of consciousness serving as its defining factor. We review the basic science of experience, theory of reincarnation and evolution, and the theory of creativity. Then, we discuss, step by step, how to climb the ladder of happiness.
- **Quantum Spirituality (QS24)** - We argue the case for defining and charting a worldly path to spirituality based on the exploration of the archetype of wholeness. Spiritual transformation is introduced as inner creativity—creativity directed to our inner dimension. We briefly discuss the journey from information to meaning to transformation and individuation, from IQ to EQ to supra-mental intelligence. The major part of the course is devoted to the exploration of the archetype of wholeness.
- **Introduction to Quantum Yoga (part 1) (QS25)** - Quantum Yoga facilitates a broad gamut of techniques that are extremely effective in restoring health, both physically and psychically. Many people have, unfortunately, accepted living with minor and major defects that limit them from experiencing life at its fullest. In yoga, even a disease may serve as a gateway to achieving physical, emotional, mental, and spiritual health and harmony. We will explain the approach that Quantum yoga takes in the process of healing.

Upon successfully completing the certification course requirement and pass the final exams, you will be qualified as a Counselor for people seeking Quantum Spirituality, also called Philosophical Counselling.
